

EDUCATIONAL QUALIFICATIONS

Course/Examination	Institution/University	Year of Passing	Performance
B.tech in CSE(Cyber Security & Blockchain technology)	Dronacharya College Of Engineering	Pursuing	7.48 GPA (Till 2 <sup>nd</sup> Semester)
HSC	Kendriya Vidyalaya No. 4 (Delhi Cantt-10)	2023	78.6% [393/500]
SSC	Kendriya Vidyalaya No. 4 (Delhi Cantt-10)	2021	85.0%[425/500]

**TECHNICAL SKILLS:** Blockchain, Cyber Security, Python, MERN stack, MS Office (Access, Word, PowerPoint, Excel), Power BI, Google Data Studio

**INTERNSHIPS**

- Coincent – CYBER SECURITY AND ETHICAL HACKING [8 Weeks, Feb 2024 – April 2024]
- Developed comprehensive policies and procedures to effectively monitor and address potential cyber security threats, ensuring proactive risk management and response capabilities.
  - Assessed and analyzed new technologies and products within the cyber security landscape to identify solutions that enhance overall security posture and resilience.
  - Monitored cyber security trends and recommended process adjustments based on external auditor insights into risks.

- TOPPER WORLD – Web Developer Intern [4 Weeks, Feb 2024 – March 2024]
- Designed and developed web applications leveraging HTML, CSS, and JavaScript, effectively creating interactive and user-friendly interfaces while demonstrating strong proficiency in front-end technologies to meet client specifications and improve overall user engagement.
  - Created a responsive and efficient HTML layout for a Netflix landing page, utilizing best practices in web design and development to optimize user experience across various devices, thereby showcasing strong design sensibilities and coding skills.

- Zidio Development –Web Developer [8 Weeks, Oct 2024 – Dec 2024]
- Developed a fully responsive website for Zidio Development Company using the MERN stack, implementing modern web development practices that improved user experience, functionality, and performance, while collaborating with cross-functional teams to deliver high-quality results.
  - Created a full-stack web-based task manager, demonstrating expertise in end-to-end application development.

PROJECTS

- Created Url - Shortener
- Track engagement with click counts, device analytics, and geographical insights to refine your strategies and better connect with your audience.
  - Generate user-friendly QR codes for easy sharing, enhancing accessibility and making connections seamless.
- Landing Page (Netflix)
- A "Landing Page (Netflix)," developed during my internship at TopperWorld, showcasing my ability to create professional web designs
  - Gained valuable learning experiences and overcame challenges throughout the project, enhancing my skills and adaptability in a fast-paced environment
- A Company's Website
- Completed a new website for Zidio Development Company, designed as a comprehensive resource with clear information about services and easy access to contact details.
  - Utilized React.js to build a dynamic and interactive user interface, enhancing functionality and user engagement.
  - Implemented responsive design principles for a seamless experience across devices, emphasizing a user-centric approach that prioritizes intuitive navigation.
- Cyber-Triage Tool
- Developed Triage-O-Matic, a decentralized blockchain-based cyber triage tool featuring advanced AI/ML capabilities for automated analysis and anomaly detection, designed for high-security environments.
  - Implemented a user-friendly interface for investigators to efficiently interact with the blockchain, enabling secure storage and retrieval of evidence hashes, analysis results, and case metadata.

**AWARDS AND ACHIEVEMENTS (Attended 5 Hackathons across Corporates, K.R Mangalam, MAIT, DTU, SRCC with Total Cash prize of Rs. 40 Dollars)**

Blockchain Track Prize (40 Dollars Cash Prize) – HackwithMAIT 5.0 –(25,000+ Participants) [2024]

POSITIONS OF RESPONSIBILITY

- Cyber Security Team (Deviators, DCE) [August 2024 – Present]
- Active member of the Deviators Tech Club, contributing to a collaborative environment focused on technology exploration and skill development in various areas.
  - Served as a member of the Cyber Security team, participating in discussions and initiatives to enhance knowledge and awareness of cybersecurity threats and best practices.
  - Engaged in hands-on projects and workshops, gaining practical experience in cybersecurity tools and techniques, including ethical hacking and vulnerability assessment.
  - Collaborated with team members to develop security solutions and strategies, fostering a proactive approach to tackling cybersecurity challenges within the tech club and the broader community.

OTHER INTERESTS AND ACTIVITIES

Passionate about cybersecurity, web development, and blockchain technology; skilled in Python, Rust, and Solidity, and eager to explore innovative solutions to secure digital assets.

Enjoy tackling challenges through problem-solving in the MERN stack, while also keen on engaging in hands-on projects to enhance my skills in the cybersecurity domain.
